

## Aspen Newsletter - 1st Production Hull Finishes August, 2009

Good Day All,

Attached are photos of the first production Aspen 28' hull, as it was popping out of the mold Monday, August 24, 2009!!!

History in the making! My hope is, this is number ONE of hundreds to come!

The Nordic team did a stellar job with the lamination, the surfaces are just fantastic - smooth- true- just beautiful.

Up She Comes

## Weights are right on target!

This first boat a F90 (the Basic open boat) is going to be used as a commuter in the San Juan Islands. It will eventually get a nice sized pilot house with seats for five. Schedule has it hitting the water about Sept. 15, 2009.

I've also included a few shots of the C90 (cruiser) deck/hardtop tooling, well underway now. Mold construction will start in about 10 days. The first C90 cruiser will be done mid-October. Power will be a Cummins 150 electronic common rail diesel.

Our Proto boat will be back in the water in the next few days, so if you need a demonstration, please call.

All the best,  
Larry Graf
