

TWO HULLS ONE MOTOR

More room, greater range, fewer expenses

The biggest 39 available—nearly 800 sq. ft. of living space. That's 40% more room than most monohulls. Better than catamarans, too. No cut-up layouts, awkward living spaces or narrow staterooms. The salon and galley are on one level along with 24' of open entertaining space. A cruising couple and their guests have king and queen staterooms with en suite shower and head. There's comfort at sea as well with a smooth, gentle, dry ride.

The Aspen 39 ProaCat™ — a revolutionary breakthrough in multihull design (patent pending).

One engine means less fuel and costs, more speed and range. Uses 70% less fuel than a typical monohull; 30% less than a cat. The single Cummins 380-bhp diesel lets you cruise efficiently at 18 knots, make time at 22 knots, or cover almost 1,000 miles at 9 knots. Around the dock, bow and stern thrusters make maneuvering a snap. And don't worry about service. Cruise as far as you like, our "no-questions-asked" team will find you.
