

Aspen C108 2027

Year: 2027

Length: 35 ft

Price: \$634,100

Located in: Burlington, WA US

Hull Material: Fiberglass

Engine/Fuel Type: unleaded

YW# 9906853

Make

Make: Aspen

Builder: ASPEN

Designer: LARRY GRAF

Measurements

Length Overall: 38.00 ft

Max Draft: 2.67 ft

Cabin Head room: 6.42 ft

Beam: 10.67 ft

Free board: 6.00 ft

Range: 322.22 mi

Engines

Total Power: 200|horsepower

Engine Brand: Mercury

Year Built: 2024

Engine Type: Outboard 4 Stroke

Engine/Fuel Type: unleaded

Engine Hours: 0

Engine Power: 200|horsepower

Tanks

Fresh Water Tanks: 150Gallons

Fuel Tanks: 1180Gallons

General Boat Description

Having a range of speed at your disposal adds to the experience of cruising. Our experienced team at Aspen understands that it's not all about go-fast boats with roaring engines. Instead, it is about finding a comfortable speed that gets you and your crew where you need to go safely and comfortably, and if it happens to be a whole lot of fun, so much the better.

An Aspen is efficient across the entire range of speed. With our patented power proa hull, Aspens don't plane, the hulls displace water. This means that they can be smoothly operated at any RPM as there is no hole to push out of. Aspens accelerate smoothly and evenly from idle up to top speed. They also do not have much of a speed penalty. Faster speeds are attained at reasonable gallons per hour burn rates and result in good miles per gallon performance, especially when compared to other vessels in their size range or that have comparable accommodations.

The large new salon has been finished with fine teak by Aspen's experienced craftsman and has 30% more livable space than previous Aspen models. Full height wrap around Solar Guard windows provide exceptional visibility while underway from the 5 person C-shaped dinette and the twin Bentley helm seats, that keep both owners and guests comfortable. The 12ft long galley includes an oven-stove combo, microwave, stainless steel sink, and multiple Burmese teak drawers. The cabin space is unparalleled for a boat this size and includes three private cabins.

More info to reference:

We always suggest and encourage our customers to come visit Aspen's headquarters and see the factory, get a demo ride, and experience how an Aspen is made. You will be able to learn more about not only how a boat is made, but the advantages of our specific design (stability, efficiency, quality). Plus, the San Juan Islands and Pacific Northwest are a fantastic place for a quick getaway.

Aspen is a custom boat manufacturer that tailors your boat to your specifications depending on how you envision using it, the process is as follows – We have limited production slots for both our smaller and bigger boat lines. When a build slot is secured, a HIN is allocated to your name in our forecasted production schedule. Reserving a slot requires a 10% deposit which extends to progress payments on the commencement of the build, funding the build stages at specific milestones of production: lamination start, lamination end, and deck set/final assembly, with a \$10,000 holdback due at delivery. The delivery day is a close date for when your insurance transfers to your ownership.

If you have any questions or need more information, please call us at 360-221-1111 or email us at info@aspenships.com. We are happy to help you with whatever you need.
